Division 5—Conservation (T1) Zone: Assessment Criteria and Assessment Tables

15.5.1 Conservation (T1) Zone

The provisions in this division relate to the Conservation (T1) Zone as follows—

- overall outcomes (section 15.5.2);
- specific outcomes and probable solutions as follows—
  - effects of development – general (section 15.5.3);
  - consistent and inconsistent uses, use classes and other development (section 15.5.4);
- assessment tables (Tables 15.5.1 and 15.5.2).

15.5.2 Overall Outcomes for Conservation (T1) Zone

(1) The overall outcomes are the purpose of the Conservation (T1) Zone.

NOTE 15.5.2A
Sub-section (1) provides the link between the overall outcomes sought for the zone and the area code and the IPA code assessment rules which refer to the 'purpose' of the code [see IPA s.3.5.13(2)].

(2) The overall outcomes sought for the Conservation (T1) Zone are the following—

(a) The Conservation (T1) Zone provides for the protection and management of the Principal Nature Conservation Areas within or adjoining urban areas, including—

(i) areas or features of particular habitat significance;
(ii) the diversity of habitats for flora and fauna;
(iii) land which acts as wildlife corridors;
(iv) important areas of remnant, endangered, vulnerable, rare and other significant vegetation;
(v) significant wetlands; and
(vi) natural areas of particular importance in terms of scenic amenity;

to the general exclusion of the majority of land uses.

NOTE 15.5.2B
(1) The Conservation (T1) Zone is depicted in two ways—

(a) unbroken lines – representing committed conservation areas; and
(b) broken lines – indicative and subject to further detailed assessment.

(2) Some of the land within the Conservation (T1) Zone is affected by development constraints, particularly bushfire hazard and flooding.

(3) Refer to the overlay maps and Part 11 to determine whether a proposal is affected by an overlay.

(b) Recreational activities are located and designed to avoid significant adverse impacts on environmental values, visual and scenic amenity values and ecological values.

(c) Provision is made for nature based recreation experiences and other ecologically sustainable land uses where appropriate to the capacity of the land.

(d) Uses and works within the Conservation (T1) Zone are located, designed and managed to—

(i) conserve the natural features/values of the land;
(ii) maintain the conservation status of the land;
(iii) be compatible with surrounding uses and work, in particular any declared nature conservation areas, regional recreation parks or areas subject to a conservation agreement;
(iv) minimise soil erosion, landslip and siltation of watercourses and achieve sound catchment management practices;
(v) avoid modification of riparian areas;
(vi) maintain the scenic value and visual quality of areas within the zone, particularly prominent ridgelines and escarpments;
(vii) maintain the safety of people, buildings and works; and
(viii) avoid significant adverse effects on the natural environment.

(e) Reconfigurations in the Conservation (T1) Zone are generally limited to the ‘amalgamation’ or ‘consolidation’ of existing lots to the general exclusion of most other lot reconstructions.
15.5.3  Effects of Development – General

(1) Management Plans

Specific Outcome
(a) Bushland management plans and strategies are prepared and implemented for significant areas of native vegetation to deal with issues such as—
   (i) introduced plants and animals;
   (ii) fire control;
   (iii) fragmentation – loss of contiguous habitat;
   (iv) eutrophication of stormwater runoff;
   (v) supplementary planting and natural regeneration;
   (vi) appropriate public access, public use and low impact recreational activities which do not diminish environmental values;
   (vii) restoring a diversification of habitat; and
   (viii) dumping of rubbish.

(2) Uses and Works

Specific Outcome
(a) Uses and works (including any clearing) protect the native flora and fauna found in the area, blend with the surrounding landscape and conserve or enhance the scenic quality of the land having regard to—
   (i) building height;
   (ii) the colour and type of materials;
   (iii) boundary clearances, in particular the potential affect on adjoining land;
   (iv) building setbacks from the road network, in particular along Designated Roads;
   (v) vegetation protection; and
   (vi) the form, scale, bulk, style and siting of buildings, particularly within any bushfire risk areas.

(b) Uses and works abutting conservation areas provide for compatible activity at the interface with the conservation areas, including provision for effective buffering measures, bushfire management plans and restricted access.

(c) Wherever possible, sites used for buildings, and related works for eco-tourism and other uses encompass cleared land, or land outside the Conservation Zone (T1).

(3) Building Design and Placement

Specific Outcome
The design and placement of buildings ensures—
(a) buildings generally remain subservient to and do not dominate the open landscape;
(b) buildings maintain the visual prominence of any significant landmarks and conserve important view corridors;
(c) buildings are not significantly affected by flooding or stormwater drainage;
(d) buildings are sympathetic and respectful to places of cultural significance or streetscape value;
(e) effective community safety measures are incorporated;
(f) large expanses of blank wall are avoided, particularly where visually prominent;
(g) obsolete or extraneous buildings are removed and/or screened from view;
(h) attention is given to the design of roof forms and the placement of plant and equipment on sites with sloping topography or where areas are readily viewed from above;
(i) buildings are generally limited to 1 storey in height and are kept low scale;
(j) an additional storey is not provided unless appropriate with—
   (i) the scale of adjoining development;
   (ii) the extent of fall across the land; and
   (iii) the character and amenity of the area and the overall townscape.

(4) Operation of Road Network and Access

Specific Outcome
Uses are located and designed to—
(a) ensure the safe and efficient operation of the road network;
(b) avoid access to Designated Roads and in particular avoid the creation of multiple access points along a Designated Road, unless the premises do not have an alternative frontage to a dedicated road or other alternative access;

(c) avoid the creation of a new traffic hazard or increase an existing traffic hazard; and

(d) not unduly interfere with ecological or hydrological processes or scenic values.

(5) Effluent Treatment and Disposal

Specific Outcome

(a) Uses and lots are able to be provided with adequate on-site effluent treatment and disposal.

NOTE 15.5.3B
For further information about the requirements for on-site effluent treatment and disposal, refer to Standard Sewerage law and On-Site Sewerage Code.

(6) Residential Amenity

Specific Outcome

(a) Non residential uses and works do not have a significant detrimental impact on the amenity of the surrounding area, including through the—

(i) operation of machinery or equipment;

(ii) emission of odours, noise, dust, waste products, light, electrical interference or otherwise;

(iii) disposal of sewerage effluent/wastewater and stormwater drainage into ground and surface waters; or

(iv) generation of traffic (including dust) travelling to or from the use.

(b) Carpark areas are designed so not to detract from the visual amenity of conservation areas or to detract from the amenity of nearby residential areas.

(c) Wherever possible, shared use of carparking areas occurs.

(7) Tourism or Major Recreation Facilities

Specific Outcome

(a) Conservation areas are protected as a managed open space system integrating conservation and recreation opportunities and other sustainable land uses in keeping with the environmental and scenic values of the area.

(b) Any tourist or major recreation facility—
Part 15—Ripley Valley Master Planned Area Structure Plan, Div 5—Conservation (T1) Zone

15.5.4 Consistent and Inconsistent Uses, Use Classes and Other Development

Specific Outcomes

(1) The following are consistent uses, use classes and other development categories in the Conservation (T1) Zone—

(a) caretaker residential;
(b) animal husbandry, if the lot is one hectare or more in area;
(c) carrying out building work not associated with a material change of use, if building work on an existing building on site and if complying with the Planning Scheme Building Matters Code;
(d) clearing of vegetation if complying with the Vegetation Management Code;
(e) earthworks if complying with the Earthworks Code;
(f) home based activity which complies with the Home Based Activities Code;
(g) minor building work;
(h) minor utility;
(i) placing an advertising device on premises which complies with the Advertising Devices Code.

The following uses, use classes and other development categories are consistent with the outcomes sought for the Conservation (T1) Zone if of a type and scale appropriate for the prevailing nature of the area and the particular circumstances of the site and its surrounds—

(a) animal husbandry, if the lot is less than one hectare in area;
(b) business use, if a broadcasting station;
(c) carpark, if relating to ‘natural area tourism’ or ‘ecotourism’;
(d) carrying out operational work for reconfiguring a lot or in association with a material change of use;
(e) dual occupancy;
(f) intensive animal husbandry, if a riding establishment or stable;
(g) major utility;
(h) night court;
(i) park;
(j) recreation use, if for the purposes of bush walking or nature observation;
(k) reconfiguring a lot, if for farm restructuring or a ‘consolidated lot’ forming part of a ‘rural property relocation subdivision’;
(l) single residential;
(m) temporary accommodation;
(n) temporary use;
(o) tourist facility, if relating to ‘natural area tourism’ or ‘ecotourism’.
(3) The following uses, use classes and other
development categories are inconsistent with the
outcomes sought and are not located within the
Conservation (T1) Zone; and constitute
undesirable development which is unlikely to be
approved—

(a) agriculture;
(b) aviation use;
(c) business use, unless a broadcasting station;
(d) carpark, unless relating to ‘natural area
tourism’ or ‘ecotourism’;
(e) clearing of vegetation if not complying with
the acceptable solutions in the Vegetation
Management Code;
(f) community use;
(g) correctional centre;
(h) display housing;
(i) entertainment use;
(j) extractive industry;
(k) forestry;
(l) general industry;
(m) general store;
(n) institutional residential;
(o) intensive animal husbandry, unless a riding
establishment or stable;
(p) mixed residential and commercial (large
scale)
(q) mixed residential and commercial (small
scale)
(r) multiple residential;
(s) nuclear industry;
(t) plant nursery (wholesale);
(u) reconfiguring a lot unless for farm
restructuring or for a ‘rural property
relocation subdivision’;
(v) recreation use, unless for the purposes of
bush walking or nature observation;
(w) service trades use;
(x) shopping centre;
(y) special industry;
(z) temporary sales office;
(aa) tourist facility, unless relating to ‘natural area
tourism’ or ‘ecotourism’;
(ab) wine making.

21 Assessment categories may also be affected by overlays. See overlay maps to determine whether the land is affected.

22 For impact assessable development, ‘relevant assessment criteria’ are provided to assist the preparation of an application and in no way affect the regard given to the planning scheme as a whole in accordance with section 3.5.5 of the IPA.

23 See Ipswich Planning Scheme Users Guide 2 for examples that explain the type of development involved in different proposals.

24 This does not include building work that under IPA Schedule 8, is exempt and cannot be made self-assessable or assessable by a planning scheme.

25 Under IPA, Schedule 9, the reconfiguring of a lot is exempt and cannot be made self-assessable or assessable by a planning scheme if the proposal is for amalgamating 2 or more lots, for a building format plan that does not subdivide the land, in relation to the Acquisition of Land Act 1967, or on Strategic Port Land.
